Akash Zendekar

Bangalore, Karnataka, India | +91-9591563645 | akashzendekar@gmail.com
LinkedIn | GitHub | Portfolio

Summary

Information Science and Engineering graduate with hands-on internship experience in Python development and AI/ML. Skilled in Python, Flask, REST APIs, SQL, databases, TensorFlow, Scikit-learn, OpenCV, YOLOv8, and Git. Experienced in developing web applications, APIs, machine learning solutions, and data-driven applications. Seeking an entry-level Software Engineer, Python Developer, or AI/ML role to apply technical skills and contribute to software development projects.

Skills

Programming Languages: Python, Java, SQL
Frontend Development: HTML, CSS, JavaScript
Backend Development: Flask, REST APIs,FAST APIs, SQLAlchemy, CRUD Operations
AI and Machine Learning: TensorFlow, Scikit-learn, YOLOv8, OpenCV, Data Preprocessing, Model Training, Model Evaluation
Databases: MySQL, PostgreSQL, MongoDB, SQLite
Tools and Platforms: Git, GitHub, Docker, Postman, VS Code, Streamlit
Software Concepts: OOP, SDLC, Agile Methodology, Authentication, API Integration
Soft Skills: Problem Solving, Analytical Thinking, Communication, Team Collaboration

Experience

AI/ML Intern, Ashtaksha Labs Pvt. Ltd., Bangalore – Jun 2025 to Dec 2025
- Built computer vision solutions using Python, OpenCV and YOLOv8.
- Performed data preprocessing, model training and evaluation on real-world datasets.

Python Full Stack Developer Intern, Besant Technologies, Bangalore – Jan 2026 to Jun 2026
- Developed Python Flask web applications with MySQL and REST APIs according to given specifications.
- Implemented CRUD operations using SQLAlchemy and optimized SQL queries for performance.
- Followed Agile and SDLC practices while collaborating with developers on code reviews.

Projects

AI-Powered Help Desk Ticket Management System GitHub
Python, Flask, SQLAlchemy, MySQL, OpenAI API
- Built a full-stack help desk system with authentication, ticket management, CRUD operations, and role-based access.
- Integrated OpenAI API for ticket summarization, classification, priority suggestions, and troubleshooting.
- Implemented ticket search, filtering, assignment, status tracking, and admin dashboard features.

Smart Expense Tracker with AI GitHub
Python, Flask, SQLite, REST API, Google Gemini
- Built an expense tracker with authentication, budgeting, analytics, and REST APIs.
- Integrated Google Gemini for expense analysis, financial insights, saving tips, and AI chatbot.
- Added interactive spending charts, PDF reports, expense filtering, and budget tracking features.

Road Traffic Accident Detection using YOLOv8 GitHub
Python, YOLOv8, OpenCV, Streamlit
- Developed a YOLOv8 system to detect road accidents from traffic videos using OpenCV.
- Trained a custom YOLO model for 300 epochs on approximately 4,000 images and built a Streamlit interface.
- Implemented confidence-based detection and displayed processed video frames with accident bounding boxes.

Education

Bachelor of Engineering in Information Science and Engineering, Akshaya Institute of Technology, Tumakuru – 2022 to 2026
CGPA: 8.0/10

Certifications

AI and Machine Learning, Besant Technologies – 2026
Data Science for Everyone, Reliance Foundation – 2025
Python Programming, Reliance Foundation – 2025
Software Engineering Job Simulation, JPMorgan Chase – 2025
