Akash Zendekar

+91-9591563645 | Bangalore, Karnataka | akashzendekar9591@gmail.com | GitHub | LinkedIn

Objective

Information Science and Engineering graduate with internship experience in AI/ML and Python development. Proficient in Python, Flask, SQL, REST APIs, TensorFlow, OpenCV, Git, debugging and problem solving. Seeking a Software Engineer role to design, build and deploy intelligent, scalable software solutions.

Education

Bachelor of Engineering in Information Science and Engineering 2022 – 2026
Akshaya Institute of Technology, Tumakuru *CGPA: 8.0/10*
- Relevant Coursework: Data Structures, DBMS, Operating Systems, Computer Networks, Software Engineering

Skills

Programming Languages: Python, SQL, Java, JavaScript

AI/ML: TensorFlow, Scikit-learn, OpenCV, YOLOv8, Data Preprocessing, Model Training & Evaluation

Frameworks & Libraries: Flask, SQLAlchemy, REST APIs

Databases: MySQL, PostgreSQL, SQLite

Tools & Platforms: Git, GitHub, Postman, VS Code

Software Concepts: OOP, SDLC, DBMS, Authentication, CRUD Operations, Error Handling

Operating Systems: Linux, Windows

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Communication

Experience

Python Developer Intern Jan 2026 – Jun 2026
Besant Technologies *Bangalore*
- Developed Python-based web applications using Flask and implemented RESTful APIs for backend services.
- Designed CRUD operations, integrated MySQL databases, and followed Object-Oriented Programming (OOP) principles.
- Collaborated using Git, debugged applications, and participated in software development lifecycle (SDLC) activities.

AI/ML Intern Sep 2025 – Dec 2025
Ashtaksha Labs Pvt. Ltd. *Bangalore*
- Developed computer vision applications using Python, OpenCV, TensorFlow, and YOLOv8 for image analysis and object detection.
- Performed data preprocessing, feature engineering, model training, and evaluation to improve machine learning model performance.
- Built automation scripts for dataset preparation and model testing using Python and NumPy.

Projects

AI-Powered Help Desk Ticket Management System | *Python, Flask, MySQL, REST API, OpenAI API* GitHub
- Developed a Python-based Help Desk Ticket Management System for issue tracking and application support workflows.
- Designed REST APIs, CRUD operations, role-based authentication, and MySQL database integration using Flask.
- Integrated OpenAI API for automated ticket classification, troubleshooting suggestions, and AI-powered responses.

Smart Expense Tracker with AI | *Python, Flask, MySQL, SQLAlchemy, REST API, OpenAI API* GitHub
- Built a secure expense tracking application with authentication, dashboard analytics, and transaction management.
- Developed REST APIs, CRUD operations, and database management using SQLAlchemy and MySQL.
- Integrated OpenAI API for AI-powered expense categorization, budget recommendations, and financial insights.

Road Traffic Accident Detection System | *Python, YOLOv8, OpenCV, Streamlit, Pandas, NumPy* GitHub
- Developed an AI-based road traffic accident detection system using YOLOv8 and OpenCV for real-time object detection.
- Trained and evaluated a custom deep learning model on annotated traffic datasets to improve accident detection accuracy.
- Built a Streamlit web application for real-time prediction, visualization, and automated accident monitoring using Python.

Certifications

AI & Machine Learning – Besant Technologies, 2026

Python Programming – Reliance Foundation, 2025

Software Engineering Job Simulation – JPMorgan Chase, 2025

Oracle Agentic AI Foundations (2026) - Oracle, 2026
